

American Vision began from our desire to raise the bar in quality installation and customer service after our own frustrating window

buying experience years ago. Now, after thousands of happy customers, our vision has proven successful. People want a great product, as well as timely and professional installation, backed by unprecedented customer service.

- Bill and Kathleen
Owners, American Vision Windows

Why American Vision Windows?

- We will provide you the highest of service standards. From cost estimating to scheduling and installation, we want to make sure you are completely satisfied through the entire process.
- We even follow-up after your project is complete. After all, part of our role in improving the quality of your home is ensuring the process is a smooth one.
- A replacement window is only as good as its installation. We do not hire subcontractors or laborers. Our installers are AAMA certified and use only the best manufactured products in the business. Anything less than these standards will decrease the efficiency and performance of your new windows.
- We offer a lifetime installation warranty, not just one or two years like most others.
- We offer a wide selection, which means you have choices.
- We have a full customer service department working to exceed your expectations.
- After nearly 10,000 home installations, we have a AA Rating with the Better Business Bureau. Proof we are committed to keeping our customers satisfied.

Do You Need Replacement Windows?

Here are solutions to common questions many people like you are faced with. If you answer yes, to any of these questions, replacement windows may increase the quality of your living!

Are your windows difficult to operate?

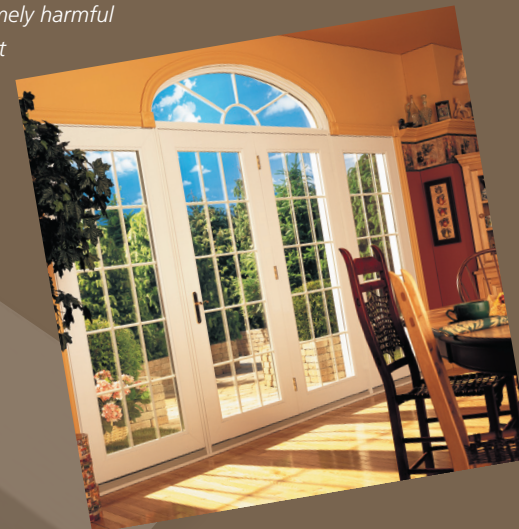

Windows that are difficult to operate are common with old windows as well as some builder's new home standard windows. Double hung and slider windows are a very popular and affordable solution to the difficult to operate problem.

Do cold drafts seem to be running through your home?

Replacement windows have many energy efficiency and energy saving air tight features to help combat drafts and allergens from entering your home.

Are your carpet, furniture and drapes fading?

When left unfiltered, the sun's rays can be extremely harmful to interior surfaces or your home. Heat and direct exposure from the sun can cause surfaces to fade, crack or peel. With UV coating on your windows, you have an efficient layer of protection against the sun's damaging effect on your home's interior.

Does outside noise interrupt your privacy?

Whether it is traffic or noisy neighbors, disruptions from the outside can disrupt the calm inside your home. We offer a variety of styles of dual-paned windows – just the answer to keep unwanted noise out.

Do you want to lower your heating and air conditioning costs?

Our replacement windows are manufactured to provide the highest quality in energy saving features. You are sure to see immediate savings in your energy bills because your home will be better insulated.

Is there condensation build-up on your windows?

Features such as weather stripping help prevent moisture from seeping in and damaging your interior and corroding your exterior – in addition to significantly decreasing the amount of allergens allowed to enter.

Do you want added security for your home and family?

To provide added security to your home, features available on several of our windows include a Cam lock device, Continuous Interlock and Exterior glaze. In addition, all of the windows we install are California Forced Entry Certified and have exceeded the toughest forced-entry resistance tests in the industry.
